
Project Progress

Week 1:

Summary

Setup github. Created canvas page. Decided deadlines for milestones. - 10/22/2023

Week 2:

Summary

Learned sqlite essentials. Started to implement prototype. - 10/29/2023

Week 3:

Summary

Implemented my prototype. Started working on my Version 1 implementation. 11/5/2023

Week 4:

Summary

Finished Ver1.py. Need to do some final touchups still and then begin ver2 prototype. I got a little behind from the group project work, but I am hoping to catch up to my milestones this week. 11/13/2023

Week 5:

Summary

Completed my ver2 prototype. 11/19/2023

Week 6:

Summary

Completed several tests. Implemented Strategy Design Pattern into code. After group project is submitted I am going to work on finalizing my code with some design patterns implemented and final refactoring, as well as finish up all my tests once that's complete. 11/30/2023

Week 7:

Summary

Finished up all my final touches. Finished up final tests. Implemented a GUI tkinter popup box to display tables/entities from the report and query commands. Finished up my documentation. Making sure my github has all the necessary information and then project will be submitted. 12/8/2023
