

```
1  ## Version 1 Requirements:
2  * As a user, I want to manage my time by recording and tracking how I use my time, so
3  that I can keep an inventory of my schedule to refer to.
4  * As a user, I am comfortable with the CMD, so I want to use the CMD to record and query
5  my schedule.
6  * As a user, I want to record information using the format "DATE FROM TO TASK TAG",
7  because it is a simple format I will be able to remember easily.
8  * As a user, I want flexibility, so that it will make my user experience easier and more
9  linient.
10 * As a user, I want to query my data using the format either "query DATE", "query TAG",
11 or "query TASK", to allow me to get all the information that I need
12 in a easy and reliable way.
```
